Discovering Cheese

Taste discovering cheese

'Taste discovering cheese' is the latest new development from Dairygold Food Ingredients UK Ltd. The brand's philosophy is to:

"Offer a premium range of specialty cheeses assembled to assist our customers to reflect in their product offering the increasingly sophisticated tastes and nutritional requirements of modern consumers."

Recent years have seen a rapid increase in the volume of sales of specialty & continental cheeses. This growth is being reflected in prepared foods. From sandwiches to ready meals, pizza's to sauces, all categories feature continental or provenance cheese as an added value ingredient. Retailers are often the first to recognise the changing tastes of consumers and are keen to include these trends within their products. This is especially so in the premium own brand sector where provenance and quality are key to the products commercial success.

Dairygold Food Ingredients UK recognises this trend and offers within 'Taste discovering cheese' a true 'one stop shop' for manufacturer's cheese requirements. Taste will provide Chefs and New Product Development colleagues the widest range of provenance, continental, organic & premium cheeses available to meet specific briefs and to inspire new ideas.
